Summary

Frontend Developer with 3 years of hands-on experience building and modernizing web applications across corporate and agency environments. Proficient in React, Vue.js, Next.js, and TypeScript on the frontend, with complementary backend exposure in Node.js and PHP. Experienced in delivering real-world systems including a Line-integrated messaging platform for student welfare and a full-featured real estate management system. Equally comfortable developing performant WordPress websites using modern builders, bringing a versatile and pragmatic approach to every project.

Experience

M&M Marketing Agency – Lusail, Qatar

February 2026 - June 2026

Web Developer

- Built 3 (three) mobile-responsive WordPress websites with custom theme development for automotive clients
- Maintained 8 (eight) WordPress websites intended for content changes, feature implementations, security improvements, and digital media presence releases.
- Collaborated with SEO specialists for improving a Wordpress website, reducing technical issues by 91%, achieving a 22% increase in site optimization metrics
- Optimized 2 (two) WordPress websites' performance, achieving a 90+ Lighthouse/PageSpeed insights

Marketing Master IO - Makati, Philippines

September 2024 - February 2026

Fullstack Web Developer

- Built and enhanced a multi-repo real estate CRM platform using Vue 3, TypeScript, Astro, PHP/CodeIgniter, and Firebase Functions, supporting both internal operations and public-facing property experiences.
- Integrated lead capture, OTP verification, Cloudflare Turnstile validation, and analytics endpoints using PHP/CodeIgniter, improving inquiry security and making contact and conversion tracking more reliable.
- Designed and maintained whitelabel, branding, sitemap, and SEO features using Astro and Vue, improving discoverability and enabling customizable client-facing real estate pages.

adish International Corporation - Makati, Philippines

February 2023 - September 2024

Lead Frontend Developer

- Oversaw the development team through handling coding, task management, code reviews, mentoring and evaluations
- Developed coding guidelines and scalable architectural frameworks
- Created responsive, interactive global frontend components optimized for APIs and cross- browser compatibility

Fullstack Web Developer

- Integrated interactive and dynamic features based on Figma prototypes, utilizing modern Javascript frameworks and libraries
 - Contributed to internal documentation and knowledge bases, ensuring accessible and up-to- date resources for the development team
 - Implemented features and bug fixes with a focus on efficiency, scalability, and maintainability
-
